

Moorsafe-anchor[®]

a safer and environmental-friendly mooring

Moorsafe-anchor[®]

**The strongest anchor ever!!!
with an unique anchor design**

DNV test report nr. 40000566-2 shows Moorsafe anchors holding power reaches 123 times the anchor weight.

A 30 kg Moorsafe anchor is stronger
than a 6 000 kg concrete block mooring.

72 kg Moorsafe anchor is stronger than
a 20 000 kg concrete block mooring.

See the video and DNV anchor tests at www.moorsafe.com

1. Moorsafe anchor shows more than **t w i c e** the holding power compared to Vryhof Stevpris market leading offshore anchors.
2. Moorsafe, after scaling up, will **h a l v e** the costs and CO2 emissions for anchoring Floating Offshore Wind.
3. Moorsafe's slender shape penetrates deeper into the seabed, with less sediment disturbance, reaching the highest holding power.
4. Moorsafe is the safest and most competent anchor and can withstand 45 degree sideway and uplift forces. (Safer anchoring means less insurance costs)
5. Moorsafe anchors (30kg and 72kg) have been sold in more than 4000 units and have proven its superior holding power in a variety of soil conditions.
6. The Swedish Traffic authorities should anchor a floating road bridge with 22 pcs of 20 tons concrete blocks = 440 ton, but we did the job with 22 pcs of 72kg Moorsafe.
7. The Swedish Coast Guard have chosen our 30kg Moorsafe for storm anchoring of offshore oil lenses. (Superior holding power and easy installation and retrieval)
